SUMMARY

Undergraduate Information Technology student who is interested in learning and building useful software applications. Interested in Artificial Intelligence, Machine Learning, and Full-Stack development. I like solving problems and building real-world projects using modern tools and technologies.

EDUCATION

Chaitanya Bharathi Institute of Technology (CBIT), Hyderabad

May 2027 (Expected)

Bachelor of Engineering in Information Technology

CGPA: **8.74**

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks, Machine Learning, Deep Learning, Artificial Intelligence, Database Management Systems

TECHNICAL SKILLS

Languages	: Python, Java, SQL, JavaScript
Web Development	: HTML, CSS, Bootstrap, React.js, Node.js, Flask, Tailwind CSS, REST APIs
AI / ML / DL	: CNNs, Anomaly Detection, Pandas, NumPy, Matplotlib, Scikit-learn
Big Data	: Apache Kafka, Apache Spark (RDD, DataFrames, Structured Streaming, GraphX), Hive, Pig, HDFS
Databases	: MySQL, MongoDB
Cloud & DevOps	: AWS (EC2, S3, Lambda, DynamoDB), Docker, GitHub Actions, CI/CD, Nginx, SSH
Tools	: Git, GitHub, Postman, Elasticsearch/OpenSearch, Raspberry Pi, LaTeX

PROJECTS

Intelligent Cloud-Based Log Analyzer

🐙 GitHub

- Architected a serverless AWS pipeline using **S3, Lambda, and OpenSearch** to ingest and analyze **10,000+ log records** for real-time security monitoring.
- Applied **Isolation Forest** and z-score normalization for hybrid anomaly detection, improving identification of suspicious activities while reducing false-positive alerts.
- Integrated **Elasticsearch/OpenSearch** to enable near real-time querying and analysis across large log datasets with sub-second search performance.

Personal Blog with CI/CD — GitHub Actions & AWS EC2

🐙 GitHub

- Built an end-to-end **CI/CD pipeline** using GitHub Actions that automated **100% of deployment workflows** for a personal blog hosted on AWS EC2.
- Implemented secure **SSH-based deployment** and automated build pipelines, reducing deployment time from several minutes to under **30 seconds**.
- Configured **Nginx** as a reverse proxy and web server, ensuring reliable application delivery and simplified production deployment.

Online Movie Ticket Booking Website

🐙 GitHub

- Developed a movie ticket booking platform using **HTML, SQL, and JDBC** supporting role-based access control for administrators and users.
- Designed and implemented relational database operations for managing movies, schedules, bookings, and user records across **multiple interconnected tables**.
- Ensured safe concurrent seat booking through **transactional concurrency control**, preventing double-booking race conditions and maintaining data consistency.

PUBLICATIONS

Intelligent Cloud Based Log Analyzer for Security Monitoring Using AWS

Paper

Ambeer Shravan Kumar, B. Harish Goud, Bandari Lakshmana Prasad Published in *IRJET*, Vol. 13, Issue 04, Apr 2026

- Proposed a serverless cybersecurity monitoring framework leveraging AWS cloud services and machine learning-based anomaly detection.
- Integrated **Isolation Forest**, rule-based threat analytics, and OpenSearch to improve security event detection and log analysis efficiency.

CERTIFICATIONS AND ACHIEVEMENTS

- Vault of Codes – Internship and Training Completion Certificate (2025)
- MongoDB Certified Developer – Python (2024)
- Google Cloud Computing Fundamentals – NPTEL (2024)
- 4-Star Python Programmer – HackerRank (2024)
- **CBIT Football Team** — Represented institute at the National-Level Inter-Engineering College Sports Fest (VJIT Sports Fest).
